CROSBY™ HOPS

Quality at the Source™

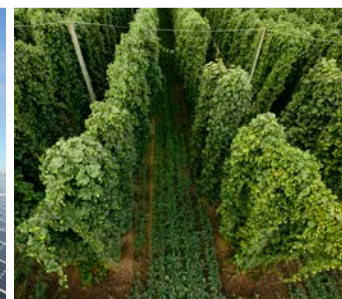

Crosby Hops™ grows, sources, and processes premium hop products from around the world. Our commitment to quality extends beyond our farm in Oregon, USA working directly with world-class growers to provide our customers access to the best hops in the world grown by the best growers in the world.

Crosby Hops™ produces unique, craft-inspired Type 90 hop pellets that offer exceptional utilization and dry hopping capabilities in our state of the art T90 pelleting facility. We carefully process our softer style hop pellets under low temperature conditions, further preserving the robust flavor and aroma compounds sometimes lost during conventional pellet processing.

Our global supply chain ensures that our hops are stored below freezing to lock in the flavor and aromatic properties brewers have come to love from Crosby Hops™.
